

Discover Meraki Dashboard: Where AI and Networking Excellence Meet

Enjoy optimized performance through every touchpoint—from global multi-cloud networks down to the device level. Deliver automation and comprehensive intelligence through your enterprise network—all via a single intuitive dashboard. It's all possible with the Meraki cloud-managed platform.

[BOOK MY DEMO](#)

Harnessing the power of AI through the Meraki dashboard:

1. Seamless Wireless Experience:

Get efficient Wi-Fi network visualisation, management, and monitoring with AI-driven wireless assurance. You'll also benefit from 2D-to-3D mapping for enhanced network optimization.

2. Optimized Wireless Performance:

Simplify troubleshooting and boost productivity with AI-powered self-optimization capabilities. You'll gain visibility, view historical insights, and uncover actionable data for Radio Resource Management (RRM).

3. Interference-Free Network:

Gain comprehensive support across multiple frequency bands, AI-driven scan radios, and machine learning-based device classifications for a disruption-free network operating at maximum efficiency.

5 reasons customers favor Cisco Meraki

Enterprise-grade Features

Network Optimization

Intelligent Data Insights

Measurable Outcomes

Transformative Results

Transformative results with the AI-based cloud platform:

99.99% Cloud SLA

750K + Customers

+90%

experienced hours in time saving.

+64%

were protected against security threats.

+45%

boosted customer & employee satisfaction.

+52%

are better equipped for a digital future.

Don't just take our word for it—experience the transformation yourself with a Meraki Dashboard demo.
